

To **OR** Not Bike to Bike?

By: Mavis
Nicholas
John
DSI 36

Overview

01

Background and Problem Statement

Mavis

02

Data Walk-Through

Nicholas

03

Conclusion and Recommendations

John

Background: Fictional Student of DSI 36

Caught in morning rush hour

01

Mondays and
Tuesdays 9 am at
CBD , March to June

02

Bus and MRT too
crowded, journey 1
hour

Wants to Ride Motorcycle

Faster: 20 mins
max

Cost efficient
(unemployed and
poor)

Motorcycling to GA

Cost-Efficient

Parking is cheap, fuel is cheap, tax is cheap

Time-Efficient

Won't get stuck in traffic jams

Pros

Cons

Vulnerable to Weather

Soggy shoes and socks

Safety Concerns

Acknowledge that more likely to get into accident, but rainfall related?

Unfavourable conditions in Singapore

167 rain days a year

"Much of the rain is heavy and accompanied by thunder"

But windows could be possible

<http://www.weather.gov.sg/climate-climate-of-singapore/>

Unsafe?

Motorcycles make up only 14% of vehicle population in Singapore:

BUT, in relation to rainfall?

<https://www.police.gov.sg/media-room/statistics?filter=2DDE3860D1BB4FD6AE91F9B08CFA1E45>

Problem Statement: Addressing the Cons

Goal

Assess possibility of riding (relatively) dryly and safely motorcycle to campus; can plan accordingly

Identify hours that are likely to rain < 3mm

Determine if rainfall really affects safety

Hourly rainfall

7am - 9am
5pm - 8pm

Campus days

Monday's +
Tuesday's
March - June

Monthly Traffic Incidents

with injured or dead motorcyclists

Monthly Rainfall

Data provided

Data Visualization

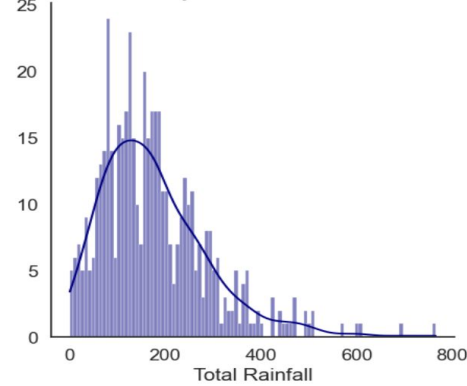

Distribution of data

Distribution of Number of Rainy Days per Month from 1982 to 2022

Distribution of Monthly Total Rainfall from 1982 to 2022

Total Rainfall per Month from 1982 to 2022

Number of Rainy Days per Month from 1982 to 2022

Data Correlation

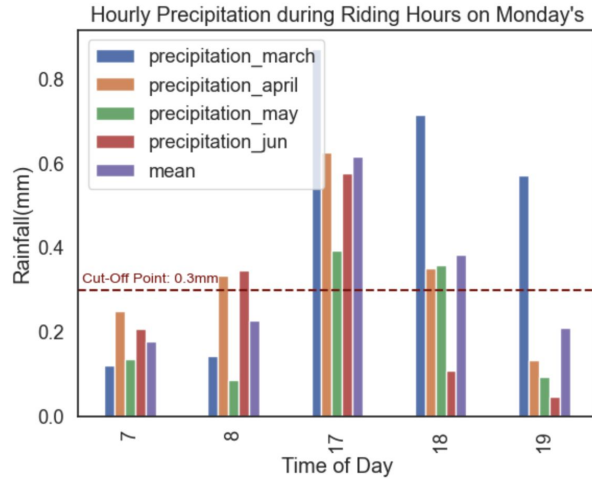

Primary Findings:

- Total rainfall & motorcycle fatalities (close to no corr)
- Total rainfall & motorcycle injuries (close to no corr)

Secondary Findings:

- Total injured & motorcycle injuries (strong positive corr)
- Total traffic deaths & motorcycle fatalities (strong positive corr)

Findings:

- Optimal time of transport to campus is between 7am to 8am
- Optimal time to leave campus is after 6pm

Recommendations and Conclusions

Coworker who rides his motorcycle everyday

Work shirt in here

"Traffic doesn't matter anymore"

"Haha I know what I'm doing"

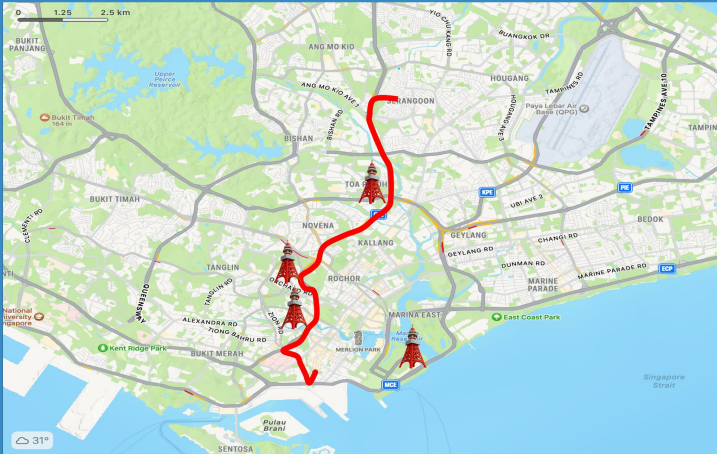

"I save so much on gas"

Here lies a 26 year old child

Further Works

Thank you!
